

On our way to the symposium „the track: axiom | südost“
in september 2013 we have a first session now.

talking communities
Saturday, the 20th of July 2013
7:00 p.m.

„clear words | Klartext“
Art business and art practice, as free of illusions

- +) **Milica Milicevic** and **Milan Bosnic** (*diSTRUKTURA*, Serbia)
- +) **Eugen Lendl**, gallery owner (Austria)
...talking with artist Martin Krusche (A)

Galerie Eugen Lendl, Palais Lengheimb, Bürgergasse 4/1, 8010 **Graz**

I like to call them „*Rambling Artists*“. As long as I know Milica Milicevic and Milan Bosnic, they are crossing Europe while practicing arts. Since 2007, when we first met, they turned into *diSTRUKTURA* and are now kind of running artists in residence to make experience and to make a living.

Milan Bosnic is a cultural worker too. As head of the NGO „*ProArtOrg*“ with it's space „*Magacin*“ at the Kraljevic Marka, Belgrade, he also works on this part of cultural life. The upcoming evening at **Galerie Eugen Lendl**, Graz, where you can see their **current exhibition** („*next landscape*“), we will have a talk about what it means to be a self-employed artist.

The other voice of this talk will tell us about the present market situation in Austria. **Eugen Lendl** is one of the most experienced gallery owners in Styria. So let's have some clear words on living as an artist and on the conditions of these professions right now.

Martin Krusche

„In our efforts we are trying to build on an extended view of Nature - as sublime, pseudo, or synthetic nature in urban constellations - aiming to define the various relationships, both real and virtual, that create the realities of modern-day life in which art has the significant function of pointing to and defining, without any utilitarian means, the evolving drama around us.“
